# Regional Office Responsibilities

Investigate citizens' concerns about potential violations of environmental protection laws and regulations.

Protect Missouri's environmental quality by inspecting facilities that conduct activities that could affect the environment.

Provide a regional perspective on environmental issues in developing long-term solutions to environmental issues.

# Regional Office Responsibilities

Participate in public activities to promote environmental education at the local level.

Provide technical assistance to area residents and businesses in understanding and implementing Missouri's environmental laws and regulations.

Other activities to ensure that facilities are following Missouri environmental laws and regulations

# Air Unit Functions

Emission inventory  
audits

Inspections of air  
pollution sources

Inspection of asbestos  
abatement projects

EMI

# Air Unit Functions

Process open burning permits

Provide technical assistance

Site surveys of new sources prior to permit issuance

# Hazardous Waste Unit Functions

Closure inspection  
of TSDs

Compliance  
evaluation  
inspections of  
hazardous waste  
generators

Provide technical  
assistance

# Hazardous Waste Unit Functions

UST inspection/follow-up  
LUST inspection/follow-up

Registry site inspections  
Resource recovery  
inspections

# Water Pollution Control Unit

## Functions

Review plans and specifications

Technical assistance

Water operator training and certification

# **Water Pollution Control Unit Functions**

**Wastewater operator training  
and certification**

**Grant and SRF inspections**

**Industrial pretreatment  
inspections**

**NPDES permit drafts and  
renewals**

**NPDES permit facility  
inspections**

# Water Pollution Control Unit Functions

**Animal waste facility  
inspections**

**Construction permit issuance**

**Engineering report and plan  
review on Ag-Chem secondary  
containment**

**Land application facility  
inspections**

EMI

# Solid Waste Management Unit Functions

Solid waste processing  
facility inspections

Solid waste disposal  
facility inspections

# Solid Waste Management Unit

## Functions

Waste tire/illegal dump  
investigations

Waste tire storage  
facility inspections

# Do not Burn Tires!

It is illegal to even burn one tire on a brush pile. The fumes and smoke from burning tires are hazardous to human health and decrease overall air quality.

# Do not Discharge Wastewater

Straight pipes are almost always illegal.  
Wastewater is any water that has been used,  
including gray water, or come into contact with  
business operations or products.

# Do not Accumulate Solid Waste

Missouri law prohibits anyone other than approved landfills from taking waste from others - including demolition waste that has not been approved as clean fill material.

# Do not Burn Waste

It is illegal to burn waste from a business. Missouri law does allow an individual to burn domestic waste from their personal (non-business) use when not prohibited by local ordinances. However, it is important to protect others from breathing the smoke and fumes from this activity in case toxins are present.

# Do not Burn old Structures

It is illegal to dispose of old structures by burning. The reuse of materials is encouraged but materials not reused **must** be disposed of in an approved landfill.

# TIME FOR QUESTIONS ????
